GREEN FINGERS

A garden can become anything in your child's imagination, a faraway forest filled with fairies, the great outback or just a place to be peaceful and alone. Take a look at some of the ideas we have compiled to get the organic juices flowing. Plan a garden around her favourite nursery rhyme, is she is a fan of Cinderella, get those pumpkins planted. Start a Jack and The Bean Stalk garden by using a support to train beans, sunflowers or other climbing plants to grow "Alive" tent for endless hours of hideout thrills.

Teach your child her A B C's by planting anything from Asters to Zucchini to make you own alphabet garden. A Pizza garden is pleasing on the eye and all you need to do is plant a garden in a circle and divide it into wedge shape sections, each section with a different plant. To make it more exciting plant herbs that can be used as a topping on her favourite pizza.

A great way to introduce your child to different cultures is to focus on a foreign country and to pick the plants that they use in their traditional dishes. Once you have harvested the "crops" use them when you prepare a tasty dish for the family. The options are endless... GET GROWING

Sow those seeds!

- Mark out the bed and help your child dig the soil over to a spades depth
- Let you child remove large stones or rocks and pull up the weeds at the roots
- Dig compost into the soil
- Help her rake the bed to level the soil before watering
- After allowing the bed to settle, sprinkle seeds evenly across the bed making sure the seeds don't blow away
- Cover the seed with a thin layer of finely sifted compost and soil
- Press down the soil with the back of the rake and let her water the bed with a fine spray of a watering can
- Keep the soil moist until the seeds are established and remove the weeds by hand

Once seedlings are large enough to handle, check that each has enough space to grow: if some are crowded, help you little one to move them to empty spaces in the bed.

Happy Gardening!

THE TOY STORY

Liz Jones a mother of two daughters knows the value of having a good educational toy box in the house.

Do your children really need this? YES! With the mounting safety and security concerns we no longer allow our children the natural learning opportunities where we found around every corner in years gone by. Would you let your children walk around to the local café to spend their pocket money? What about your kids exploring the neighbourhood on their bikes?

Some Toy Box Ideas

The following items can be used to develop your child's essential skills through play. All items can be used in a simple or more sophisticated form to suite their age and ability of the individual.

- Building Blocks
- Peg board with task cards
- A Shape and colour game with task cards
- Large rubbery shapes (Large enough for your child to stand on)
- Beans Bags
- Large shape, colour the dot dies
- A threader, with a plastic nib on the end, to be used with plastic shapes, large beads and thread able items
- Skipping Rope
- A Ball
- Large pieces of paper A3 and bigger
- Crayons, paints, pencils, glue, scissors (Adult supervision may be required)
- A bag of dress up cloths
- Puzzles
- Play dough
- A doll or action figure

A few DIY ideas

Colour dry pasta pieces or beans with food colouring and let your little one thread the pieces onto cotton or string, Alternatively let them glue pop corn kernels, lentils or rice onto glue pictures to help them master their fine motor and hand coordination.

When sorting out the laundry let your child assist you with finding pairs of socks to develop matching and sorting skills

ROSEBUDS

PRE-PRIMARY SCHOOL

St Teresa's new Rosebuds Pre-Primary School is based within our beautiful campus in Craighall Park, Johannesburg for girls aged 3-5 years old. At Rosebuds Pre-Primary, we have adopted the world-renowned Reggio Emilia approach as one of our foundational philosophies.

This approach is based on the belief that every child is unique, expresses their interests in different ways and has a natural curiosity, leading to spontaneous and dynamic learning. School Principal Lynne Elfick describes the space as an ideal environment for innovative and collaborative play where children have the freedom to create, experiment and engage freely with the world around them.

"Rosebuds is a place where young children can discover and explore their world engaging with nature and one another. We encourage self-expression, imagination and problem-solving. While the children interact with their surroundings, they discover and make connections, they examine and experiment and this in turn leads to exciting revelations and even more learning. We know that preschoolers learn through play, which is why it is important that they have the opportunity to play in a variety of ways from an early age. Imaginative and fantasy play gives them the opportunity for self-expression and develops essential life skills such as social interactions, problem-solving and planning."

TALKING ABOUT TEETH

Unlike the human skin which is constantly renewed we only granted two sets of teeth during our lifetime. We explore the dental world to find out what you can do to help your child keep her pearly white's for life.

The teething process begins when the first baby tooth pierces through the gums between 5 and 10 months after birth. Teething will cause the little one some discomfort as the teeth force their way through the gums, however there are ointments that can be used to provide temporary relief from the pain. By age 3 all twenty baby teeth should have emerged, this helps with playing a role of chewing and Speech development.

Tips for great teeth

- Try to fill your bedtime bottle with water and after you child has had milk, this helps to clean the teeth. Using a bottle or pacifier for long can cause misalignment of her teeth.
- Let your child play with a dry toothbrush at an early age to interest her in brushing.
- Sugary, acid, sticky food and drinks create the harmful bacteria so encourage your child to eat veggies, fruit and fibre foods.
- When your child starts brushing her teeth, stand behind her to teach her how to brush properly so she can do it solo for 3 minutes. While doing this develop a routine for brushing and flossing.

Did you know?

If you don't floss, 35% of the tooth surface is left un clean.

Snacking increases tooth decay

THE AGE GAP

Despite the past hype surrounding the 2 year age gap, many unanswered questions echo in the minds of today's parents.

The age gap debate is old news to any society even today. Age gap families are common but are occurring under different circumstances to those our parents or even the experienced. Due to an increase in divorces and the number of dual income families. Advances in the medical field would allow woman to safely undergo childbirth later in life, financial and career status concerns and even lifestyle preferences.

The time periods during which couples begin a family or consider having their next child has changed. Although much focus has been placed on the 2 year age gap, every age gap, regardless of duration, has its own associated effects on the child, sibling and parent.

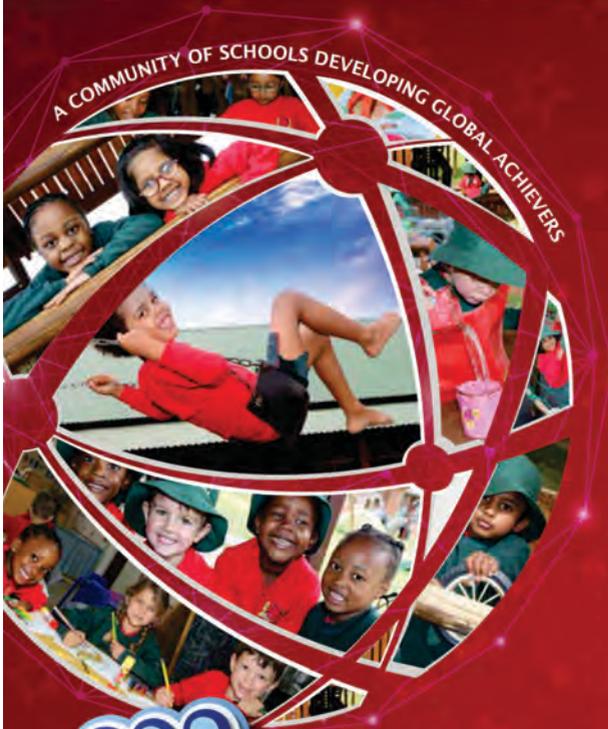

A child matures on a social, physical and mental level consisted of a fixed pattern. Parents must be aware of the actions of the child development related to the age gap. When the younger sibling arrives, this can cause the older sibling to act out and they will each have different demands at the same time.

Whatever the situation you are in, always be mindful of what is going on around you, look at each child individually and spend some quality time with them alone and not just as a family, get to know their needs and wants, find out what makes them laugh. Remember being a parent is a really hard job, but worth every bit.

## ABOUT US

**ESTABLISHED SINCE 2009.**

Hilltop Friends Preschool and Playschool is a Christian Preschool and Playschool & dedicated grade R class

**FROM 8 MONTHS TO 6 YEARS OLD**

The quality of education and the level of care, love and attention we give our children are the hallmarks of Hilltop Friends. We are exceptionally serious about what we do. We know that looking after your child/children is a matter not to be taken lightly.

Children learn whilst having fun and using all their senses to explore, navigate and discover the world.

### QUALIFIED TEACHERS AND TEACHER ASSISTANTS.

Our school campus is unique with huge, natural shaded and wonderfully looked after grounds with two separate playgrounds for Junior and Senior Side. Our nutritious and balanced meals are all freshly prepared on the premises and designed by a Professional Dietician.

**30 Kornalyn Street**

**Douglasdale Jukskei Park border**
